BankFabric

PROTECT.
CONNECT.
AUTOMATE.

BankFabric from SKsoft is your path to secure banking automation.

BankFabric is the engine that powers secure, two-way communication between your ERPs and the banks and financial institution where you do business. Connect to any bank, in any format, anywhere in the world.

Elevate Finance and Treasury with Intelligent Banking Automation

BankFabric provides seamless connectivity between your Microsoft Dynamics platform and your banks. Developed by banking and treasury experts, BankFabric stores inbound and outbound bank files, and provides a secure platform for bank communications and/or file encryption.

✓ Automatically import bank statements
✓ Reconcile bank statements with a fully unattended solution
✓ Fine-tune matching and mapping with configurable rules
✓ Gain visibility across all bank accounts and legal entities
✓ Automatically reconcile transactions

Connect to Bank Systems Worldwide

With seamless embedded connections to all major banking platforms, BankFabric integrates with 170+ banks and financial institutions worldwide, and we're regularly adding more. Our banking software experts will design a custom integration for you.

Why Use BankFabric?

Achieve effortless banking automation by embedding BankFabric directly into your ERP or treasury system. Save time, improve visibility, and reduce risks associated with banking and treasury activities.

Secure Bank File Storage
Securely store banking files with BankFabric's Azure-hosted solution, utilizing encrypted Azure blob storage available across any geo-location or Azure replication.
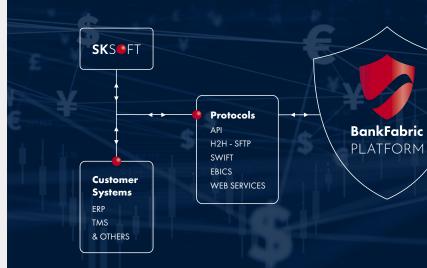

Seamless Bank Communications
Facilitate smooth bank communications through BankFabric's integrated SFTP support, allowing easy authentication via user passwords or SSH keys, coupled with the added security of PGP Sign/ Encrypt functionality.

Efficiency Through Automation
BankFabric reimagines ERP efficiency by automating key banking processes, ensuring reliable communications and effortless transactions. BankFrabric brings your financial operations to a new level of efficiency.

How BankFabric Works

BankFabric is the engine that powers secure, two-way communication between your ERPs and the banks and financial institutions where you do business. Supporting multiple protocols and nearly unlimited bank file formats, BankFabric uses both the environment DNS and a unique encrypted "secret" to verify the appropriate ERP environment is communicating value with the corresponding BankFabric environment to ensure your banking and treasury transactions remain accurate and secure.
